Cellebrite

Digital intelligence
for a safer world

Pro Series

Advance the case with access to the widest amount of digital evidence and insights.

Investigations need the full picture as quickly as possible.

The challenges to digital evidence are constant. Technology is evolving rapidly, device locks are complicated, encryption is strengthened continually, growing cloud-based apps and storage house valuable insights, and a flood of data is generated every moment. As digital devices and applications become more embedded in our lives, they present exponential challenges for investigative teams. There's no time for device backlogs, uncooperative service providers or long, manual reviews of disparate data. Today's forensic examiners and investigators need proven unlocking, extraction, decoding and analysis capabilities that deliver the whole picture in great detail. They need Cellebrite's Pro Series.

95%
of respondents consider mobile devices their most significant data source[1]

48 hrs
If investigations don't have solid leads, suspects or arrests within that time, the chances of solving a case drop by half

Harness the digital intelligence within the most comprehensive forensic data.

Cellebrite's Pro Series extracts the most forensically sound data from the widest variety of devices, applications, social media and cloud-based sources. This trusted suite of integrated tools correlates and merges data into a unified format for easier, quicker examination and analysis. The Pro Series uses automated, powerful analytics to simplify and enrich complex data across multiple sources to discover relevant patterns and connections faster. Forensic examiners and investigators can easily collaborate in real time to find the evidence to solve crimes and build defensible cases sooner than ever before.

Choose from two powerful suites of tools

- UFED Pro Series LX provides extraction, examination and analysis of data from digital devices and public domain social media by integrating UFED Ultimate, Analytics Desktop and Cellebrite Reader.
- UFED Pro Series CLX provides the same robust tools as LX, but also includes UFED Cloud Analyzer for access to a wide variety of private social media and cloud based sources.

The top three digital forensic challenges[1]

85% Device and application encryption

41% Aggregating and analyzing big data

60% Amount of data stored off the device and in the cloud

Nearly 80% of respondents report some level of device backlog in the last year. 44% of those lasted 1 to 12+ months.

Key benefits of the Pro Series

### Create the strongest case with the most digital evidence

Access data reliably and effectively from the widest variety of digital sources. Use a comprehensive toolkit with advanced capabilities to bypass locks and overcome encryption, and extract and decode visible, hidden and deleted data from the most devices, operating systems and applications. With the Pro Series, you can also extract and preserve public domain data and optional legally pre-approved private data from social media and other cloud-based sources to create the most comprehensive view of digital evidence.

Focus forensic efforts to find the greatest insights

Spend more time analyzing data, and less time collecting and normalizing it. Integrate extraction, decoding and analytics capabilities to more easily carve, mine, organize, search and filter data. Identify key evidence and visualize connections within raw digital data faster to harness the actionable intelligence that can build stronger cases and solve crimes.

Unify the entire investigative team in analysis

Share key insights with the broader team quickly and easily to advance the case sooner. Centralize disparate data into a unified format that forensic examiners, analysts and investigators can use to examine and collaborate on the investigation throughout each stage.
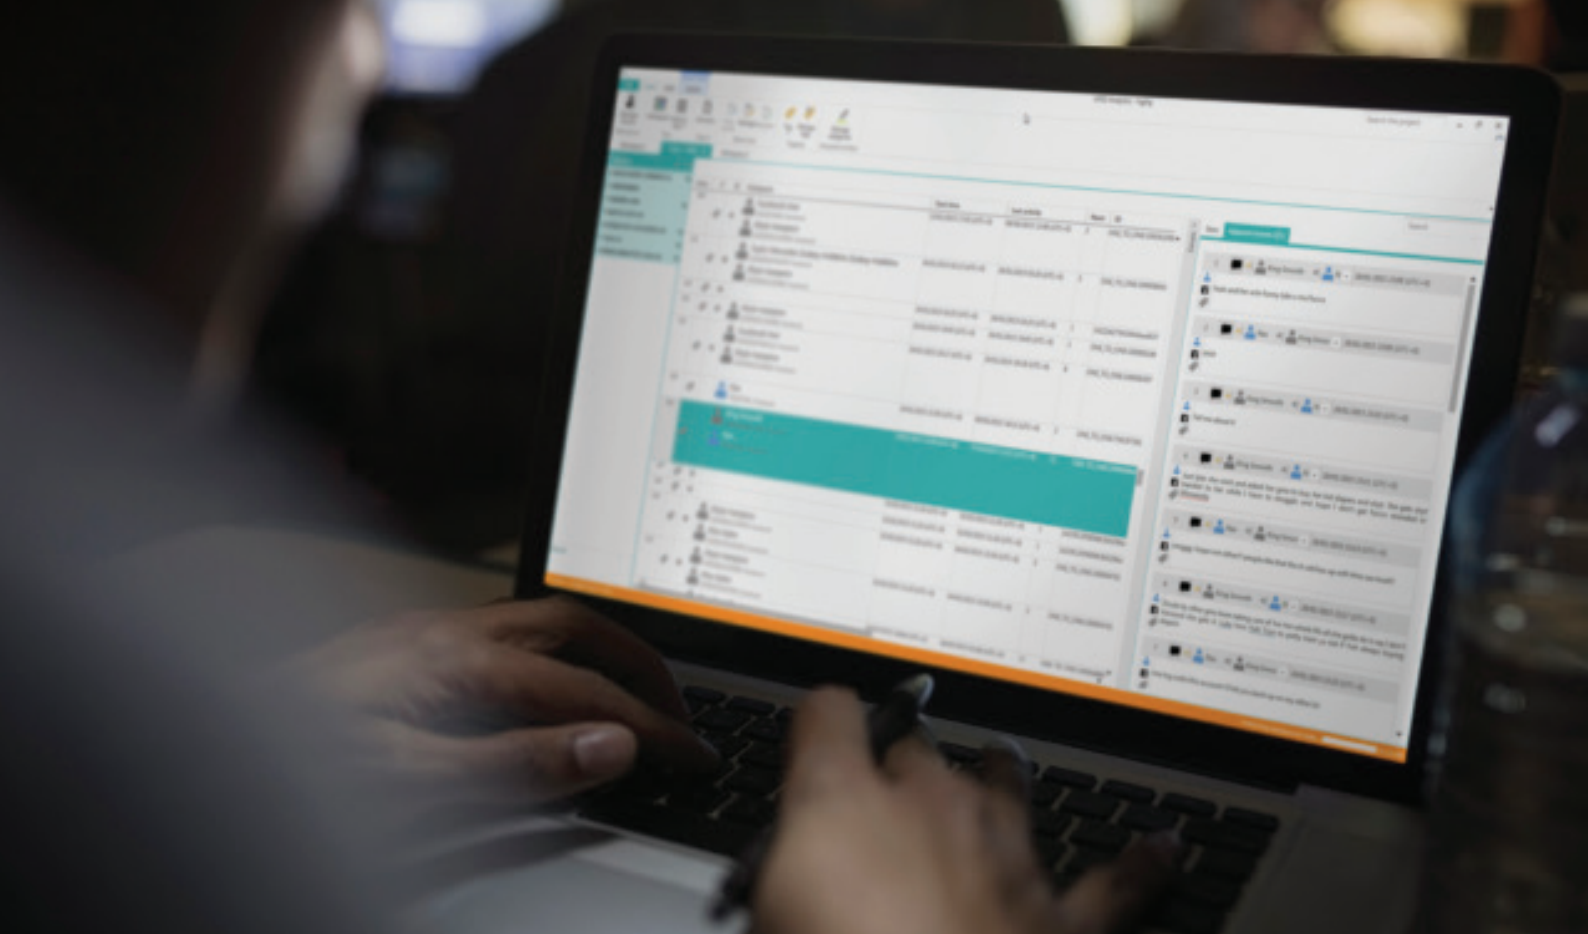

Ensure evidentiary integrity

Reliably collect evidence and demonstrate chain of custody using Cellebrite's unique, proven and repeatable forensic process. Empower personnel to testify with confidence about the tools and processes used to recover evidence, so prosecutors can better prove cases and improve conviction rates.

Capture all findings comprehensively

Log each action with dynamic, robust reporting capabilities. Easily generate and share reports in a simple, intuitive format with the entire team, even those that may not have access to Cellebrite extraction and analytics software. Review findings thoroughly and collaboratively with advanced features such as search and bookmarking, to create a single, comprehensive document that includes all investigative progress.

Pro Series in action

A police officer pulls over a suspect driving a recently reported stolen car. He identifies the driver as a suspected gang member and makes an arrest, seizing both his phone and tablet.

In the lab, an examiner uses Pro Series CLX to access deleted texts uncovering boasts about stealing not only this car, but three others. UFED Cloud Analyzer reveals Facebook posts showing the suspect in front of the car and details about the "take".

Unified data extracted from both devices uncover communications between a number of people, both known and unknown to police. Analytics Desktop reveals connections to these suspects and highlighted case related data, indicating involvement in an even larger city-wide auto theft ring.

Enrich investigations by choosing the powerful toolkit that supports your forensic needs.

The Pro Series LX includes everything you need to extract, examine and analyze data from digital devices and public domain social media, including:

UFED Ultimate

Comprehensively extract, decode and forensically examine every ounce of a device's data. Bypass locks and overcome encryption barriers to perform advanced logical, file system and physical extractions from the widest range of devices, operating systems and applications. Recover deleted data and files to expose the entire memory of the device. Quickly reveal evidence hiding in plain sight by automatically extracting and preserving public domain data from multiple social media sites in one workflow to further enrich digital examinations.

Analytics Desktop

Simplify digital evidence analysis to generate leads faster, reduce case cycle times and uncover insights that can solve the case. Automate complex analysis across a huge volume of disparate data sources, such as call logs, text messages, geolocations, images, videos and more. Visualize unified data from various viewpoints and isolate key details via advanced text, image and video analytics to create actionable intelligence for the whole case team.

Reader

Generate and share dynamic reports even with case team members that may not have access to Cellebrite extraction and analytics software. Add your input to the report with review features, such as advanced search and bookmarking, to create a single, comprehensive document that includes all investigative progress.

By upgrading to the Pro Series CLX,
you gain access to even more potentially
critical data from private social media and
other cloud-based sources with:

UFED Cloud Analyzer

Key digital evidence often resides beyond physical
devices. Immediately capture, preserve and analyze
both public domain and legally-preapproved private
social media data, instant messaging apps, file storage
and cloud-based content, so you can access valuable
evidence in a much shorter timespan. Easily search,
filter and sort data to quickly identify suspects, victims,
locations and more – even if the device remains locked.

86.1%

of agencies surveyed in 2013 use social media
for criminal investigations[2]

Deliver digital intelligence to your entire investigative team.

Investigator

Access the evidence and critical insights you need to see
the big picture, make your next steps clear, preserve
the evidence and build a stronger case.

Forensic examiner

Overcome device locks and encryption obstacles, extract
comprehensive, forensically sound data, and accelerate
processing backlogs to find case insights.

Command staff

Maximize your digital forensic investments to help
accelerate investigations, solve more cases and
streamline operations.

Transform your investigation and empower your team with tools that make a safer world more possible every day.

Digital intelligence for a safer world

Digital data plays an increasingly important role in investigations and operations of all kinds. Making data accessible, collaborative and actionable is what Cellebrite does best. As the global leader in digital intelligence, and with more than 60,000 licenses deployed in 150 countries, we provide law enforcement, military and intelligence, and enterprise customers with the most complete, industry-proven range of solutions for digital forensics and digital analytics solutions in the field, in the lab and everywhere in between. By enabling access, sharing and analysis of digital data from mobile devices, social media, cloud, computer and other sources, Cellebrite products, solutions, services and training help customers build the strongest cases quickly, even in the most complex situations. As a result, Cellebrite is the preferred one-stop shop for digital intelligence solutions that make a safer world more possible every day.
